SLAM[®] HORNET EM & EXIT 1LED

SafeEye[®]

Raw LED light is blinding and painful. SLAM SafeEye[®] is a diffuser solution that makes LED work lights safer and more pleasant to work with. SafeEye protects eyes and makes the LED light output smoother by spreading the beam without significantly reducing lumens.

REVOLUTIONIZING WORK SAFETY

Compact, simple and safe to use in confined spaces, the SLAM[®] HORNET EM 1LED is the flexible lighting solution you've been looking for.

Each unit has a back-up battery providing power to a new dual-purpose EM function, completely changing portable lighting for hazardous spaces.

The advanced electronics in the rechargeable battery control unit help the EM function generate strong light when the main power supply is lost. The EM function provides an additional safety feature by flashing at 15-second intervals when there is a power outage.

In addition to the standard EM model, you can choose the HORNET EXIT 1LED to mark designated exit routes. Build your own setup or get a specially designed set that includes everything you need.

SLAM[®] HORNET EM & EXIT 1LED

- EX-CERTIFIED FOR ZONES 1 AND 21
- STRONG LUMENS WITH SAFEYE[®] PROTECTION
- T4 TEMPERATURE CLASS
- PORTABLE, MOVE WHILE CONNECTED
- EXTREMELY ROBUST CONSTRUCTION
- RECHARGEABLE BACK-UP BATTERY UNIT
